

BLUE™
Lite

HANDHELD GRAIN MANAGEMENT

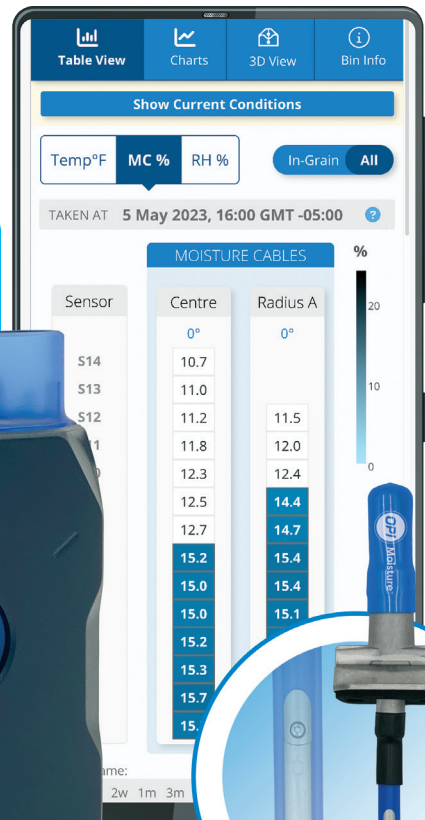

SIMPLE ON PURPOSE.

OPI Blue™ Lite delivers plug-and-play visibility inside your grain storage with on site data collection and access online.

OPI BLUE Lite - Features & Benefits

- Small Size** Easy to carry in your pocket.
- Huge Value** Control grain quality without entering the bin.
- Easy Operation** Simple to turn on/off. Easily pair Bluetooth.
- Free App** Available for all Android and iOS users.
- Quality Data** Capture readings on moisture, temperature, and CO₂
- OPI Blue Connected** Readings automatically sync to the cloud for history, alarms, fan recommendations and support services.

\$499

This hand held hardware deploys OPI Blue software to capture data you collect manually, at your bin. If you're nervous about technology, take this easy step to access data with digital backup and support recommendations for a \$100/year subscription.

BLUE™ Lite

HANDHELD GRAIN MANAGEMENT

What is OPI BLUE Lite?

BLUE Lite is OPI's next generation handheld grain monitoring device. It is a rechargeable device that uses Bluetooth to communicate with an IOS or Android app on a mobile device.

Once the mobile device has an established cellular connection the cable readings are sent to the Cloud so, they are visible for the end user in ManageGrain.com.

Is BLUE Lite a replacement for the StorMax monitor?

The BLUE Lite device is intended to have the same functional capabilities as the StorMax monitor in its ability to read both temperature and moisture cables. It can read both 2-wire and 3-wire cable configurations. Note: 90% of the systems in the field currently fall under a 2-wire setup.

Does BLUE Lite have a subscription?

Yes, BLUE Lite has a low cost, annual subscription of \$100. This subscription introduces ManageGrain.com capabilities. Track historical data, set up alerts, and find advice that will impact your operational performance.

What are the advantages of storing the Blue Lite data?

The BLUE Lite device transmits live temperature and moisture readings to the app on your mobile device. If your mobile device has a cellular connection, it will transfer the data to ManageGrain.com and allow for the accumulation of historical data for all bin readings. This historic data will accumulate and could allow the user to track temperature and moisture trends.

The user can also set Rate of Change and High Temperature Alarm threshold for each bin. These custom thresholds notify by a visual alert on the platform and text message or email if assigned.

ADVANCING
Grain Storage
Management

OPI BLUE Lite is a part of the OPI system of products driven to help you maximize grain management for your operation.

This system provides options for technology at every level of comfort.
